Professional Summary

Final-year BS Information Technology student (Major in Networks) with hands-on experience in IT support, network troubleshooting, and infrastructure maintenance. Passionate about cloud technologies and AI-assisted development, with a strong drive for continuous learning and delivering reliable technical solutions.

Technical Skills

Networking - LAN/WAN Configuration, Routing & Switching, Network Troubleshooting, Physical Network Installation, TCP/IP Fundamentals

IT Support - Hardware Diagnostics & Repair, PC Assembly & Maintenance, Windows & Software Installation, Preventive Maintenance, End-User Technical Support

Web & Automation - Python, HTML5, CSS3, AI-Assisted Software Development

Tools & Platforms - GitHub, Google Cloud Platform, MS Office, Google Workspace, Adobe Photoshop

Professional Experience

Philippine Fisheries Development Authority (PFDA) | General Santos Fishport

IT Intern | February 2026 – May 2026

- Provided first-line technical support, diagnosing and resolving hardware, software, and network issues.
 - Installed, configured, and maintained Windows systems, business applications, and peripheral devices.
 - Performed preventive maintenance and equipment repairs to minimize downtime.
 - Documented technical issues and supported end-users with troubleshooting and system configuration.
-

Projects

Projects developed using Antigravity IDE with an AI-assisted development workflow.

Signalynx Server | Django • MikroTik RouterOS API • Django-Q • Redis

<https://github.com/gabrieljohnrg01/signalynx-server>

- Built an ISP management system for subscriber management, billing, and PPPoE provisioning.
- Integrated the MikroTik RouterOS API with automated billing, SMS notifications, and background router synchronization.

EdgeStream | Django • FFmpeg • Gunicorn • Nginx • Ubuntu

<https://github.com/gabrieljohnrg01/edgestream>

- Built a media streaming server with HLS video conversion, media search, and a TV-friendly interface.
- Deployed on Ubuntu with Gunicorn and Nginx, including automated media processing and queue management.

YouTube Shorts Automation | Python • Google Gemini • Edge-TTS • MoviePy • YouTube Data API

<https://github.com/gabrieljohnrg01/YouTube-Shorts-Automation>

- Built an automation pipeline covering script generation through video publishing for YouTube Shorts.
- Combined Google Gemini, Edge-TTS, MoviePy, and the YouTube Data API to automate content creation and publishing.
